EYE PROBLEMS

PARTICLE IN EYE

Keep student from rubbing eye.

- If necessary, lay student down and tip head toward affected side.
- Gently pour tap water over the open eye to flush out the particle.

If particle does not flush out of eye or if eye pain continues, contact responsible school authority & parent/legal guardian.

URGE MEDICAL CARE.

CHEMICALS IN EYE

- Wear gloves and if possible, goggles.
- Immediately rinse the eye with large amounts of clean water for 20 to 30 minutes. Use an eyewash if available.
- Tip the head so the affected eye is below the unaffected eye and water washes eye from nose out to side of the face.

CALL POISON CONTROL.
1-800-222-1222
Follow their directions.

Contact responsible school authority & parent/legal guardian.

If eye has been burned by chemical, CALL EMS 9-1-1.
